

ESILAW 2007.3 Release Notes

© 2007 ESI Software, Inc – All rights reserved.

PDF Reporting

ESILAW now includes the ability to print and view all reports in PDF format. Reports that are printed in PDF format are automatically saved in the PDF_Reports directory using the default path of your ESILAW system. By default, these PDF reports are saved into a new subdirectory of your <ESIWIN> folder:

e.g., C:\ESIWIN\PDF_Reports\

In VIEW mode, while viewing reports on screen a new button will display on the top shortcut bar. Selecting the 'Save as PDF' button will display a "Save as" dialog box allowing you to save the PDF file using the default report name or rename the saved file.

If you print a report that is a combination of reports that are normally produced sequentially all reports will be added to a single PDF file.

Need Assistance Help Links

ESILAW 2007.3 incorporates feature-sensitive help in all areas of the application. Users can now instantly access areas of help associated to the feature they are using with the click of a mouse without having to navigate through the help contents.

New HTML Help

The Help file has been converted to HTML help to ensure compatibility with all supported Microsoft operating systems, including Windows Vista.

Vista Compatibility for Check for Update

The integrated Check for Updates and Install Updates features have been modified to ensure compatibility with Windows Vista.

Installation of Updates from CD

The process of installing updates from CD has been changed to use the Check for Updates and Install Updates features. Updates will now be installed into the ESIWIN\Servicepacks directory, allowing end users to use the integrated Install Updates feature to prevent installation of updates in the incorrect order.

Enhancements & Bug Fixes

- Various changes when making a payment to a client's unbilled disbursements.
- Additional reports have been modified to accommodate figures over \$1,000,000.
